**All About Butterflies**  
Written by Juliana Sartor

Did you know that butterflies cannot fly when they are young? In fact, before they can fly, butterflies are caterpillars! Caterpillars only crawl.

But first, caterpillars hatch from eggs. The eggs are laid by a butterfly. Sometimes it takes a while for the eggs to hatch. This depends on the weather and the season.

Once they do hatch, caterpillars spend their time eating and growing. Mostly, they eat leaves.

Eventually, the caterpillar forms a chrysalis. This is where it will turn into a butterfly. In the chrysalis, the wings grow.

When they are done, the butterfly emerges! The cocoon falls off. Finally, the butterfly flutters away.
