

Earth Day Crossword - Hard

- organic
- endangered
- ecology
- global warming
- aquifer
- carbon dioxide
- urbanization
- deforestation
- biodiversity
- renewable energy
- climate change
- sustainability
- pollution
- hydroelectric
- biodegradable
- wind energy
- recycling
- ozone
- biofuel
- photosynthesis

Down:

1. The scientific study of relationships between organisms and their environment
2. _____ farming is a method that avoids chemicals and pesticides
3. Underground water supply stored in rock and soil
5. A gas that traps heat in Earth's atmosphere
7. A long-term change in Earth's weather patterns
8. The balance between living things and their environment
10. The variety of life found in one area
11. Energy that cannot be used up, such as wind or solar power
12. Energy source created from the movement of air
13. Garbage that can break down naturally into the environment
15. The process by which plants make their own food using sunlight

Across:

4. Species that is at risk of becoming extinct
6. The gradual warming of Earth caused by greenhouse gases
9. The movement of people toward cities that impacts the environment
14. The cutting down of forests on a large scale
16. The buildup of harmful substances in soil, water, or air
17. Electricity created by flowing water is called _____ power.
18. The layer of the atmosphere that protects Earth from harmful UV rays is called the _____ layer.
19. The process of turning waste into usable material
20. A fuel made from plant or animal materials

Down:

- The scientific study of relationships between organisms and their environment
- _____ farming is a method that avoids chemicals and pesticides
- Underground water supply stored in rock and soil
- A gas that traps heat in Earth's atmosphere
- A long-term change in Earth's weather patterns
- The balance between living things and their environment
- The variety of life found in one area
- Energy that cannot be used up, such as wind or solar power
- Energy source created from the movement of air
- Garbage that can break down naturally into the environment
- The process by which plants make their own food using sunlight

Across:

- Species that is at risk of becoming extinct
- The gradual warming of Earth caused by greenhouse gases
- The movement of people toward cities that impacts the environment
- The cutting down of forests on a large scale
- The buildup of harmful substances in soil, water, or air
- Electricity created by flowing water is called _____ power.
- The layer of the atmosphere that protects Earth from harmful UV rays is called the _____ layer.
- The process of turning waste into usable material
- A fuel made from plant or animal materials
